the business innovation and skills committee has today published a report containing a number of conclusions and recommendations resulting from its inquiry into the insolvency service including i without an increase in resources the investigations unit will be unable to increase the number of cases it can prosecute which will further undermine stakeholder confidence ii there is a risk that further reductions in annual running costs and staff may put undue pressure on the insolvency service to deliver iii it is clear from the evidence that the fee generated income model for the official receiver service is unreliable in the current economic climate iv issues remain with pre pack administration which need to be addressed v given the level of debt relief they can receive it would not be unreasonable to increase the 525 upfront fee that individual debtor bankrupts have to pay the committee welcomes the news that the regulators and the insolvency industry have been working together to create common regulatory standards across the profession the creation of a single gateway for complaints common standards and a common appeals process would be an

important step in this regard the service should be required to publish an annual report that charts progress in this area
